### **D&S Engineering Labs Announces Executive Promotions**

**Collinsville, Texas:** February 7, 2022. D&S Engineering Labs, LLC a leading geotechnical and materials testing engineering firm, has announced several key executive promotions within its North Texas operation.

Mark Thomas, PE, PG has been promoted to Vice President of Engineering. In his new post, long-time employee Thomas will expand his role to lead both the Geotechnical and Construction Materials Testing Engineering groups with an increased role in corporate strategic planning. During his ten-year leadership of the Geotechnical Engineering group, Thomas managed a growing team of engineers, geologists, technicians and support staff in expanding D&S's geotechnical services.

Chase Brossett, CPA, has been promoted to Vice President of Finance, overseeing all financial and accounting functions of D&S. Brossett previously held the position of Director of Finance.

Jennifer King is now the VP of Marketing. For the past six years, King has held various leadership roles within D&S including Director of Business Development. She leads the company's sales efforts, account management and marketing, driving growth for D&S.

Additionally, four employees were promoted to Directors, including:

Bret Fischer, PE, Director of CMET Engineering  
Ibrahim Baayeh, PE, Director of Geotechnical Engineering  
Brad King, Director of Technical Operations  
Jason Middleton, Director of Operations

"Recent business growth enables the professional career development we're witnessing at D&S Engineering Labs. Our people are paramount to the success of this firm, which is why celebrating these promotions is one of my favorite things to do," said Amy Brothers, PE, President. "These leaders are dedicated and focused on driving growth and providing responsive services for our clients and this firm. I look forward to seeing them and their teams continue to thrive."

### **About D&S Engineering Labs, LLC**

Established in 2010, DFW based D&S Engineering Labs, LLC is a leading, certified Women's Business Enterprise (WBE) and Disadvantaged Business Enterprise (DBE).
